

ELECTRICAL ENGINEERING, MINOR

A student should apply for the Electrical Engineering (EE) minor prior to achieving senior standing in order to have sufficient time to complete all requirements. A student indicates intent for the EE minor by completing the necessary steps online (DegreeWorks). Interested students may find that several of these ECE courses meet requirements or technical electives in their home department.

The minor in Electrical Engineering can be fulfilled by the following requirements:

- The student must complete 18 hours of ECE designated courses at the 200-level or above.
- A letter grade of a "C-" or higher is required in all coursework for the EE minor.
- All prerequisites for ECE courses must be satisfied.

Computer Engineering and Musical Audio Engineering students cannot earn a minor in Electrical Engineering.
